

HASSAN ABDULLAH

Junior Full-Stack Developer | PERN Stack Focus

+92 302-3274949 | hassannabdullaho@gmail.com | github.com/abdullah3566 | linkedin.com/in/hassanbhutta-dev

PROFESSIONAL SUMMARY

BS Computer Science graduate (University of the Punjab, 2026) focused on full-stack development with the PERN stack — PostgreSQL, Express.js, React.js, and Node.js. Currently building Lexisera, an IELTS preparation platform with REST APIs, a student dashboard, progress tracking, and an admin panel. Brings a year of hands-on industry experience developing and maintaining live Laravel/PHP and Django platforms, including backend APIs, database queries, and production bug fixing.

TECHNICAL SKILLS

Core Stack (PERN): PostgreSQL, Express.js, React.js, Node.js, REST APIs, CRUD, Authentication

Languages: JavaScript, TypeScript, PHP, Python, Dart, C++

Also Experienced In: Laravel, Django, Flutter, MySQL, MongoDB

Frontend & Styling: React components, Tailwind CSS, Bootstrap, responsive UI

Tools & Workflow: Git, GitHub, Postman, VS Code, Docker, Deployment (Vercel, Railway)

EXPERIENCE

Laravel / PHP Developer — Aurion Tech Global Jun 2025 – Apr 2026

- Developed backend modules and REST APIs in Laravel/PHP with MySQL for a live production platform.
- Wrote and optimized database queries, improving backend performance on key user-facing features.
- Maintained live client projects through bug fixing, code cleanup, and incremental feature improvements.

Junior Developer (Internship) — Expert Soft Solutions Feb 2025 – Jun 2025

- Built and updated frontend and backend features using Python, Django, and React.js.
- Resolved bugs, integrated frontend-backend features, and shipped updates in a Git-based team workflow.

IT Services Lead — BEMCON Nov 2023 – Jan 2025

- Managed IT services, technical support, and infrastructure troubleshooting; supported digital operations.

PROJECTS

Lexisera — IELTS Preparation Platform / PostgreSQL, Express.js, React.js, Node.js, REST APIs

- Building a full-stack EdTech platform covering IELTS Listening, Reading, Writing, and Speaking practice with lessons, tasks, and student submissions.
- Designed the PostgreSQL schema for users, lessons, tasks, submissions, and progress tracking, and developed REST APIs powering the student dashboard and admin panel with complete CRUD workflows.
- Developed the React.js frontend with reusable components, authentication, and role-based student/admin views.
- Deployed the platform to production — React frontend on Vercel and Node.js/Express backend on Railway.

IPBEX Platform / Laravel, PHP, MySQL

- Developed and maintained backend modules and APIs for a live web platform, focusing on performance and security. Live: ipbex.org

Ghana Land Search / Laravel, PHP, MySQL, TypeScript

- Built database-driven search features, optimized queries, and API integrations for a real-estate search platform. Live: ghanalandsearch.com

Personal Portfolio Website / React.js

- Designed and built a personal portfolio site with reusable React components; code and repositories at github.com/abdullah3566

AI-Based Body Measurement App (Final Year Project) / Flutter, Dart

- Developed a cross-platform mobile app that estimates body measurements using AI-based image processing.

EDUCATION

BS Computer Science — University of the Punjab | CGPA: 3.35

Graduated 2026
